How to Use VLC Media Player to Play a CD or DVD
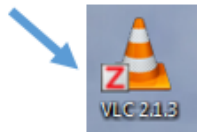

1. Turn the ITS System ON

   - See the Classroom Document for your classroom for more information on starting the system. You can find this information at www.cites.illinois.edu/classrooms/building

2. Log in to the resident PC using your netID and ICS Password
3. Insert the Disc into the **resident PC tower's** disc drive

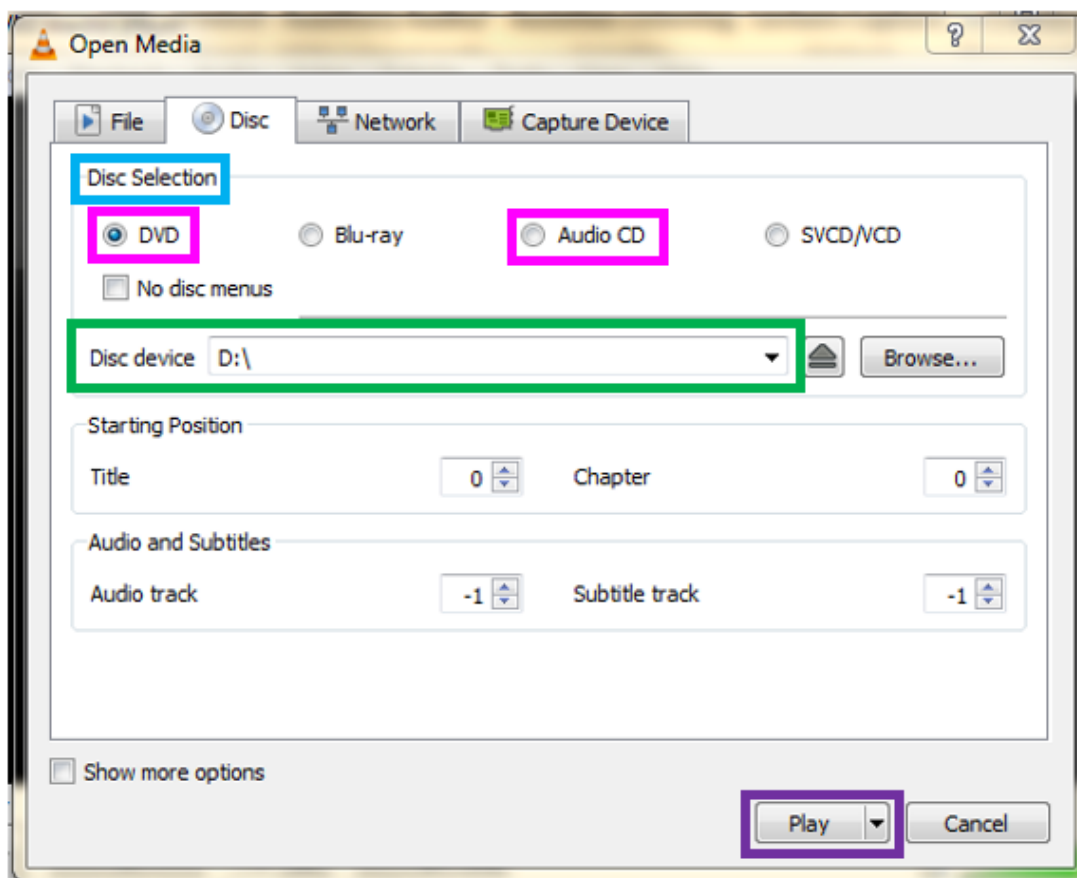

4. Double click the **VLC shortcut icon** on the desktop

5. Click the **Media** Button

6. Select **Open Disc**
7. Choose Either **DVD** or **Audio CD** under **Disc Selection**

8. For **Disc Device, select the D drive.**

9. If you would like to start from a specific place in the disc, you can choose a title, chapter, or audio track from this screen.
   - You can also navigate with the time bar at the bottom of the screen above the disc controls.

10. Press **Play**

TIPS

- To toggle between a video display and a playlist display, press the **Toggle playlist** button on the main screen. ▤
- In this view you can see the tracks on a CD
- Press this button → ▦ to enter full-screen mode
- Press this button → ▦ to exit full-screen mode
- Click **Playback**, and then **jump to a specific time** to navigate to a specific hour, minute, and second in the media you have selected.
